Lecture 6

Monday, 30 January 2023 8:31 AM

Reading Articles

1) Peer reviewed sources → look at impact factor of journals (look at highly cited journals)

2) Order of authors: first → wrote & most contribution

Corresponding authors → often permanent address (or PI)

Others → small contributions (significant enough to get some data), meaningfull

3) Highlights / Content sections.

4) Abstract

5) Figures → should contain the main points

6) Last para of intro → hypothesis & specific investigation

7) Results & discussion → Compare results in that paper to other papers

8) Read Review articles (if new paper)

9) Materials & methods → did they select appropiate methods

10) Supplementary materials

Issues:

+ Logical inconsistency
+ Overgeneralization
+ Question any assumptions
+ Statistical methods
